

Keeping Fit

Primary 4 have been enjoying their weekly swimming lessons. We have been learning how to be more confident in the pool by putting our faces under the water and learning to float on our backs.

January-March
2015
Primary 3/4

Social Studies

Our topic this term is Knights and Castles. We will be learning all about what castles are and who lived in them. We will also find out why Knights were very important people.

Healthy kids

Primary 3 now know how to take care of their teeth. We have learned all about the different parts of our teeth and what can damage them. We made posters to encourage the rest of the class to remember to brush their teeth 2 or 3 times a day.

Technologies

Last term, we enjoyed creating a new health drink.....

Honey, Funny, Milky Smoothie!

We worked together to decide which ingredients to use to make our drink super tasty and we designed eye-catching packaging that would tempt customers to buy our product. We made the smoothies in our school kitchen and they were *delicious!*

Maths

We are learning to measure weight in kilograms and grams. Did you know that there are 1000g in 1kg? Soon we will be learning to measure volume in litres and millilitres. At the end of our measure topic, we will be using what we have learned to do some baking in the kitchen. **Yum!**
